Call for Papers

briq Workshop: Firms, Jobs and Inequality

briq, Bonn
December 14–15, 2018

Organizers: Simon Jäger (Massachusetts Institute of Technology and briq)
Benjamin Schoefer (UC Berkeley)

Key Notes
Arindrajit Dube (UMass Amherst)
Philipp Kircher (European University Institute)

About the Workshop
A growing body of evidence suggests that firms play an important role in understanding the tremendous rise in wage inequality experienced in many countries in the last decades. These findings pose a puzzle for neoclassical economics, which posits that technology and skills – rather than firms and jobs – are the fundamental determinants of the wage structure. The goal of this conference is to bring together an active group of researchers in labor, behavioral, personnel and macroeconomics who investigate the role that firms and their wage setting, hiring, and promotion policies play in determining the wage structure.

Submission
Please submit papers or extended abstracts by October 1, 2018 by sending an email including the title, coauthors, and presenter along with the manuscript to maja.entner@briq-institute.org. Those selected will be notified by October 19, 2018. (In an earlier version, we had announced feedback until October 14. Due to the large number of submissions, the date has now changed!)

Funding
Economy class airfares and up to 3 nights of lodging for presenting authors will be covered according to the briq reimbursement guidelines.
Kindly note that tax regulations prohibit briq from fully reimbursing the travel expenses of participants who combine their trip with other destinations or extend their stay beyond the four–day window surrounding the event.
