

## Data and Code for Climate Shocks and Exports

The data used in this paper are provided here as Stata files (.dta), comma delimited text files (.csv), or altogether in a compressed folder. Please cite *Jones, Benjamin F. and Benjamin A. Olken, "Climate Shocks and Exports", mimeo, 2009.*

Data is in country-product-year format. Four data sets are provided, as indicated below, which vary by source of international trade data (US or "World") and by product category resolution (1 or 2 digit SITC codes).

The variables included are, in order:

-----  
year (int) Year  
country (string) Country name  
cc\_num (int) Numeric country identifier  
fips (string) FIPS country code  
isocode (string) ISO country code  
poor (byte) Poor country identifier  
wtem (float) Temperature  
wpre (float) Precipitation  
wtem\_poor (float) Temperature x poor  
wpre\_poor (float) Precipitation x poor  
sitc (byte) SITC Rev. 2 product code  
prdcnt\_id (long) Country x product code  
prdyr\_id (long) Product x year code  
g\_imp (float) Annual growth in exports of product  
-----

For further description of the data please see **Climate Shocks and Exports** (Jones and Olken 2009). For detailed description of the climate data see **Climate Shocks and National Growth: Evidence from the Last Half Century** (Dell, Jones, and Olken 2009).
