*Notes:* Columns 1 and 2 present OLS regressions of circles attributes on a dummy variable that takes the value of 1 for circles that were ranked as TOP 3. Sample consists in all treated circles and treated circles of TOP 3 inspectors, respectively. Column 3 shows regressions of circles characteristics on an indicator that takes the value of 1 if the treated inspector that ended up in that circle ranked among the TOP 3 of his group. Columns 4 and 5 report the difference in allocation between inspectors in the treatment and control group. Inspectors in Column 4 are ranked based on their performance in recovery (growth in recovery rate). In Column 5, based on their performance in demand (growth in tax base).
