

README

Note: In each folder for exercise you can find a combination of these eight dofiles, below.

Regressions

- FOSDReg: stochastic dominance regressions
- targeting_tables: targeting regressions
- TriangleLevelReg: Triangle level regressions
- VertexLevelReg: vertex level regressions
- VillageLevelReg: village level regressions

Data processing

- process_network_regressors: process network outcomes from simulations done in matlab
- process_triples_outcomes: process triples outcomes from simulations done in matlab
- merge_outcomes_networks: merge outcomes from network simulations

Note: there is no need to run these do-files since the final datasets are already there.
