

The Consequences of Radical Reform: The French Revolution REPLICATION FILES — README

By DARON ACEMOGLU, DAVIDE CANTONI, SIMON JOHNSON, AND
JAMES A. ROBINSON *

I. Contents

The replication files include the following items:

`20100816_replication_dataset.dta` This is the main dataset with urbanization data for 19 pre-unitary German polities, and a series of covariates

`20100816_replication_dataset_t5.dta` This is the dataset with data on sectoral shares of employment, needed for Table 5.

`20100816_replication10.do` This is the do-file to replicate tables 2–6 of the paper.

II. Prerequisites

To run the replication do-file, all datasets and the do-file have to be placed in the same folder. Stata version 10.0 or higher is required.¹ The local path of the folder has to be replaced in line 22 of the do-file. The do-file relies on `outreg2` to output the regression results into an Excel-readable tab-separated text file. It also relies on `xtabond2` to perform the Arellano-Bond estimation of table 4, column 8. If these commands (ado-files) are not installed in your local Stata version, type `ssc install outreg2` and/or `ssc install xtabond2` in your Stata command line.

* Acemoglu: Department of Economics, Massachusetts Institute of Technology, 50 Memorial Drive, Cambridge, MA 02139, daron@mit.edu. Cantoni: Departament d'Economia i Empresa, Universitat Pompeu Fabra, Ramon Trias Fargas, 25–27, 08005 Barcelona, Spain, and Barcelona GSE, davide.cantoni@upf.edu. Johnson: Sloan School of Management, MIT, 50 Memorial Drive, Cambridge, MA 02139, sjohnson@mit.edu. Robinson: Department of Government and IQSS, Harvard University, 1737 Cambridge St., Cambridge MA 02138, jrobinson@gov.harvard.edu.

¹The calculation of degrees of freedom with the commands `xtreg` and its alternative `areg` varies between Stata 9 and earlier, Stata 9.2 (which was originally used to perform these regressions) and Stata 10 and later. If you use a version of Stata earlier than 10, please contact the authors.

III. Variables' Descriptions*A. 20100816_replication_dataset.dta*

<code>id</code>	Identification number
<code>name</code>	Polity Name (see also Online Appendix A)
<code>year</code>	Year
<code>urbanpop</code>	Population living in cities above 5000 inhabitants (see also Online Appendix B)
<code>totalpop</code>	Total population (see also Online Appendix B)
<code>urbrate</code>	$= 100 * \text{urbanpop} / \text{totalpop}$
<code>fpresence</code>	Years of French Presence (see also Online Appendix D1)
<code>westelbe</code>	1 if located West of the Elbe-Saale river line
<code>protestant</code>	Approx. share of the population being Protestant, around 1800
<code>latitude</code>	Latitude of the polity's capital (in degrees north)
<code>longitude</code>	Longitude of the polity's capital (in degrees east)
<code>distpa</code>	Great circle distance (in km) from the polity's capital to Paris
<code>ccodenoalr</code>	First enactment of a civil code, except for the Prussian <i>Allgemeine Landordnung</i> (see also Online Appendix D2)
<code>ccodenoalroff</code>	If applicable: suspension of a civil code, except for the Prussian <i>Allgemeine Landordnung</i> (see also Online Appendix D2)
<code>ccodenoalron</code>	If applicable: reenactment of a civil code, except for the Prussian <i>Allgemeine Landordnung</i> (see also Online App. D2)
<code>ccodeall</code>	First enactment of a civil code (see also Online Appendix D2)
<code>ccodealloff</code>	If applicable: suspension of first enactment of a civil code (see also Online Appendix D2)
<code>ccodeallon</code>	If applicable: reenactment of a civil code (see also Online App. D2)
<code>agreform1first</code>	First abolition of serfdom (see also Online Appendix D3)
<code>agreform1off</code>	If applicable: Suspension of first abolition of serfdom (see also Online Appendix D3)

agreform1on If applicable: Reinstatement of abolition of serfdom (see also Online Appendix D3)
agreform2first First *Ablösungsordnung* (see also Online Appendix D3)
agreform2off If applicable: Suspension of first *Ablösungsordnung* (see also Online Appendix D3)
agreform2on If applicable: Reinstatement of *Ablösungsordnung* (see also Online Appendix D3)
guildsfirst First abolition of guilds (see also Online Appendix D4)
guildsoff If applicable: Suspension of abolition of guilds (see also Online Appendix D3)
guildson If applicable: Reinstatement of abolition of guilds (see also Online Appendix D3)
territories Number of prerevolutionary territories (see also Online Appendix C)
yr1xxx 1 if year==1xxx
fpresence1xxx Interaction term: `fpresence*yr1xxx`
protestant1xxx Interaction term: `protestant*yr1xxx`
latitude1xxx Interaction term: `latitude*yr1xxx`
longitude1xxx Interaction term: `longitude*yr1xxx`
distpa1xxx Interaction term: `distpa*yr1xxx`
territories1xxx Interaction term: `territories*yr1xxx`
totalpop1750 Total population in 1750
urbanization1750 Urbanization rate (`urbrate`) in 1750
urbanization17501xxx Interaction term: `urbanization1750*yr1xxx`
yearscc Years of enactment of civil code, as of current year
yearsag1 Years of enactment of abolition of serfdom, as of current year
yearsag2 Years of enactment of *Ablösungsordnung*, as of current year
yearsgu Years of enactment of abolition of guilds, as of current year
yearsref Reforms Index (see Paper for construction)
timetrend `=year/1000`

post1800 1 if year>1800
post1800trend Interaction term: post1800*year
fpresenceXpost Interaction term: post1800*fpresence
fpresenceXpostXtrend Interaction term: post1800*year*fpresence

B. 20100816_replication_dataset.dta

state Pre-unitary German state
year Year
id Identification Number
district District (*Regierungsbezirk*/State) name
agric Percent of population employed in agriculture
industry Percent of population employed in industry
commerce Percent of population employed in commerce
transport Percent of population employed in transport and communication
imputed 1 if employment shares imputed (by Frank, 1994)
westelbe 1 if located West of the Elbe-Saale river line
fpresence Years of French Presence (see also Online Appendix D1)
pop1849 Total population in 1849
