

Direct Democracy and Local Public Goods: Evidence from a Field Experiment in Indonesia
Benjamin A. Olken
Data Files and Programs
March 17, 2010

This directory contains the data files and programs to replicate all regression results and figures in “Direct Democracy and Local Public Goods.” The data files and programs are designed to work with Stata version 10 or later.

All programs are in the file “090321trucking.do”. Run this file from within Stata to reproduce all tables and graphs. Table output will be in the form tableX.out and figureX.eps, where the table and figure numbers match the numbers in the text.

The data files match each table. All variables are labeled, and the description of the data used in each table can be found in the text.
